

Guide to getting started with the Horse Dialog App

The Horse Dialog App is designed to allow you to easily record information about your horses such as vaccinations, farriery appointments or worming schedules. It will also remind you of appointments that you have booked. You can contact the practice via the App and there is useful advice on there for many emergency situations. Any information you add to the App that you would like to share with the practice, such as vaccination dates, can be emailed to us directly.

Step 1:

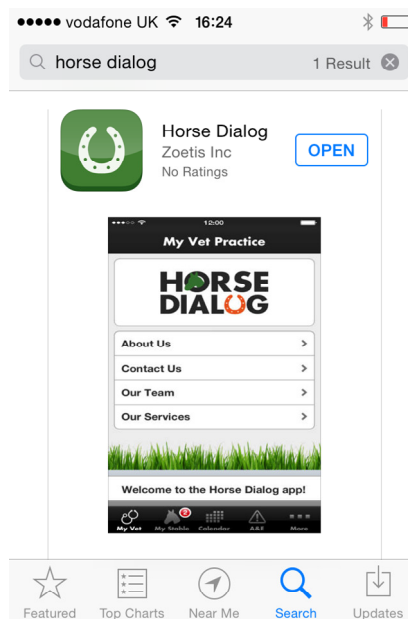

Open the 'App Store'

Search for "horse dialog" in App Store and click install.

Step 2:

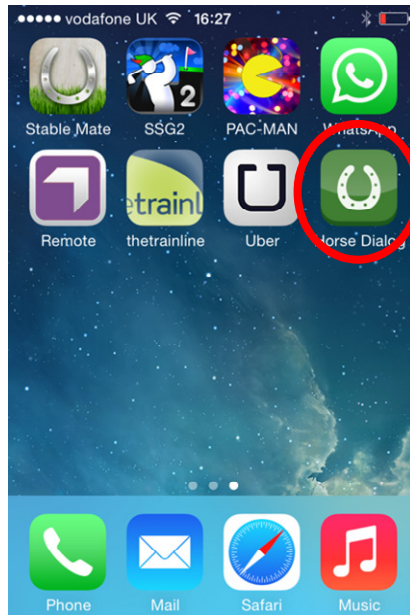

Set "Open"
